Installation

You will receive the Contrast Security PSM Universal Connector from your CyberArk representative. The following instructions show you how to configure it.

Prerequisites

The following prerequisites are required on the machine that runs this script:

- PowerShell version 3 or above
- Secured connection to the PVWA

Import

Running the Script

The following parameters are required to run the script:

Parameter Name	Expected Value
PVWAURL	The URL to the PVWA machine in the format: <code>https://<Hostname or IP>/passwordvault</code>
Import_Type	The type of file to import: 1. To import a CPM Platform enter P or Platform 2. To import a PSM Connection Component enter C or ConnectionComponent
File_Path	The path to the Zip file containing the platform.

Example

```
.\Import.ps1  
-PVWAURL https://cyberarktest/passwordvault  
-Import_Type C  
-File_Path C:\Users\Administrator\Desktop\Import\Artifactory.zip
```
